## Equipment Below 20% ROI

## Top 5 Equipment - Net Income

## Top 5 Equipment - ROI

## Summary

- Lifts, generators and cranes are the worst performing categories.
- I recommend not investing any further in those.
- Earth moving and compaction equipment, and compressors are the top money making categories.
- Concrete equipment has an exceptionally high ROI as well.
- Those four categories hold the best potential as far as future investments go.
- There are eight assets that are below target in both net income and ROI, and six assets that carry both a negative net income and ROI.
- I recommend disposal for at least the six showing a net loss.
